

## Native Perennials that like Moist, Wet, or Swampy Areas in the Sun

Natural or manmade ponds, areas that stay flooded or accumulate water from runoff or drainage ditches and rain gardens are excellent opportunities to grow native plants. There are many beautiful native perennials that will thrive in these conditions. Wet areas provide habitat for a diverse group of plants and animals. Use this palette of plants to create a beautiful and interesting garden. The colors, shapes and textures of the plants are themselves an attractive addition to your garden. In addition, you will create an opportunity to enjoy watching the butterflies, moths, birds and other wildlife that your native habitat attracts.
